

Subject: Consulta aspectos regulatorios HLGW

Dear All,

Sorry for the delay in answering your request of information.

Regarding the trade barriers in USA, the most important one is the need of obtaining the UL product certification. For their products the CE mark is enough when entering our markets. The procedures to obtain the UL certification mark are costly and some of our companies have the feeling that they take longer than needed.

Our sector is the Low Voltage Electrical Equipment.

Best regards,

Álex Burgalés
